

## **Computer Classes**

No computer knowledge necessary

Description:

There's no limit to what kids ages 5 to 7 can learn! Building important computer skills is fun and easy .We have what it takes to keep hungry young minds active, stimulated, and eager for fresh ideas. Class Includes: building basic computer skills, computer activities - 3D Computer Animation, Video Game Design, building files and folders, and typing skills.

### **Spanish and Arts&Crafts:**

Each week students will develop their Spanish Skills. Come 1 week or 3, lessons will be geared toward their level. We make learning a second language fun and exciting. Your child will enjoy being in a safe environment filled with interactive games and play geared toward learning Spanish. Beginners and intermediate kids are welcome to join the fun this summer to learn the alphabet, everyday items around the house, etiquette, Spanish culture, and More!, Arts and Crafts will be an exciting part of this class to give variety and create interactive play.

### **Comic Book Mania**

Each week we will pick a new theme for comic book drawing. Come 1 week or 3, you'll never have to worry about your child repeating a lesson. Studies show that children who are introduced to art succeed better academically. We make art fun and interactive. Students will enjoy completing a comic book using creative writing skills and drawing techniques for developing their comic book characters. Introducing a young child to artistic skills can build their confidence and encourage them that anything is possible!

### **Claymation and Video Editing 101**

Description: Create clay animations for family, friends, and YouTube! Make revolutionary animation by using Clay to bring your characters to life. Includes stop motion techniques and video editing skills that are essential in video production world today. Also Storyboarding is used to develop a series of sketches that are used to describe the work of a video segment, for movie, tv series, ect.

### **Puppet Making & Performance**

Students will enjoy the art of learning puppetry! They will get creative and use their imaginations to design puppets for a live puppet show!

### **Lego Creation & Stopmotion Animation**

Students will design cool characters that will "travel" to far away planets and go wherever their imagination takes them! Anything is possible when they build it with LEGO's! Students will learn how to create breath taking, stop-motion animation for their interactive story.

### **Computer Navigator**

Students will develop their computer savvy skills at their own pace with qualified instructors to help keep them challenged. Whether your child comes 1 week or 3, teachers will stimulate their minds with fun, interactive computer learning and play. This camp is great for visual learners. Learning to navigate the computer from an early age is essential for this generation.

### **Watercolor Painting**

Kids need NO computer knowledge, software knowledge not required.

Includes:

Fundamentals of Drawing

Color Theory

Painting Landscapes

Painting Animals and Nature

### **Culinary Cooking**

Explore and express yourself with Culinary Cooking Creations! Cooking is educational and helps develop ones imagination, team work, and leadership skills. Campers will be culinary uniforms provided by Henley's Haven. Each week campers will explore a theme such as Hawaiian Luau, Fondue, Southern cooking, Sports, Brunch, Fiesta, and Asian cuisine.
